Introduction

The 9503 Universal Leaded Speed Sensor (ULSS) was specifically designed with the tough requirements of the Heavy Vehicle and Off Road market in mind. It is ideal for ABS sensor applications, while offering customers flexibility in variations and features. The proven speed sensor has gone through vigorous testing, both in the lab and on the field. Sensata Technologies has designed the 9503 ULSS device to be flexible. This allows customers to utilize the same basic package, but also to have their custom inputs. Areas for modification include;

- Electrical characteristics (Output, Resistance, Inductance)
- Lead lengths
- Connector orientations
- Lead wire diameter
- Conduit options

Benefits

- Flexible design
- Proven in tough applications and environments
- Ideal for ABS applications

HOW IT WORKS

Sensata Technologies, Inc. ("Sensata") data sheets are solely intended to assist designers ("Buyers") who are developing systems that incorporate Sensata products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products. Sensata data sheets have been created using standard laboratory conditions and engineering practices. Sensata has not conducted any testing other than that specifically described in the published documentation for a particular data sheet. Sensata may make corrections, enhancements, improvements and other changes to its data sheets or components without notice.

Buyers are authorized to use Sensata data sheets with the Sensata component(s) identified in each particular data sheet.
